

Unmask the Stash.

The Secret World of Discreet Drug Trends

Find out what has been in front
of you the whole time

Objectives.

- ✓ Understand the types of products available on the market
- ✓ Understand the ease of creating products
- ✓ Understand accessibility
- ✓ Overview of TikTok and the havoc it is causing
- ✓ Recognize warning signs of drug use and secretive behavior
- ✓ Learn how to talk with your kids about difficult subjects

LET'S GO

Ready to Sleuth?

Over the next few slides we will see how strong
your sleuthing skills are!

Can you spot the stash?

Dab Kit/Containers

Marker Pipes

Makeup Containers

Can you spot the stash?

Water Bottle Stash

Mouse Scale

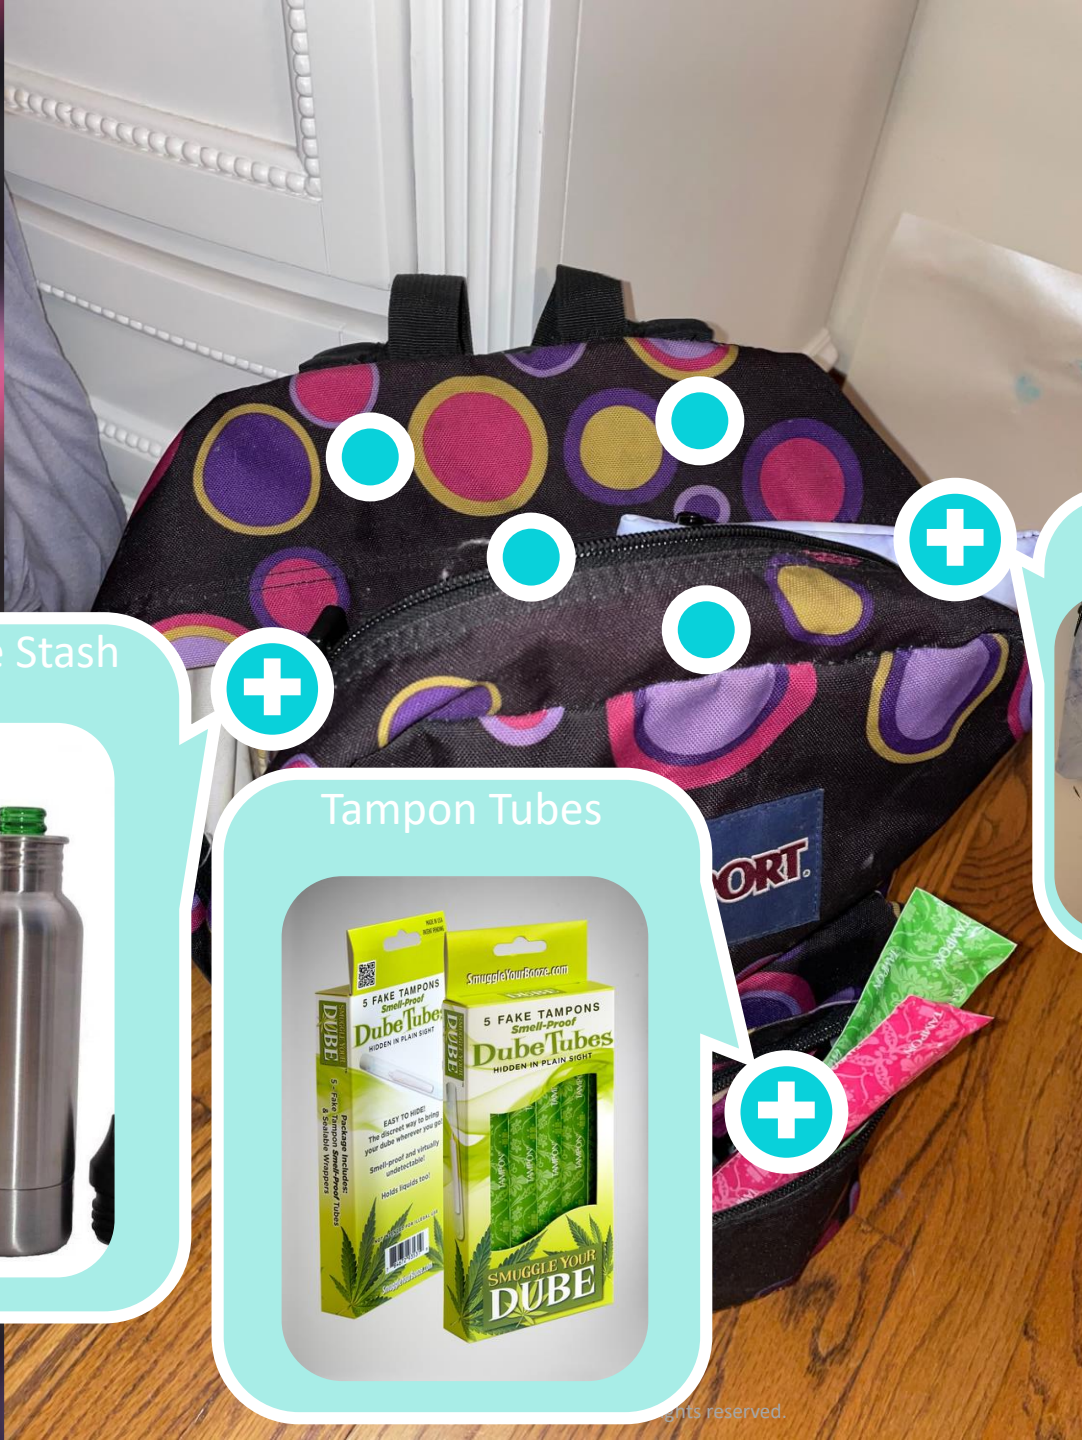

Sole Stash

Can you spot the stash?

Metal Bottle Stash

Tampon Tubes

Drug Kit

Can you spot the stash?

Pill Grinding Kit

Kleenex Box

Alcohol Vape

Unmask the stash!

There are over **50 items** in the room!

-All under **\$25**

-Some handmade
(with instructions
online)

-Can be purchased
ON AMAZON

without an adult

- No one child owns
ALL these

**Let's break
them down!**

Disguise.

- Secret compartments
- Decoys
- Locked containers
- Handmade Stash containers

In under \$10 and
less than five minutes...

TikTok
@wphilbrick

Drink.

- Flasks
- Decoys
- Flavored Alcohol
- Alcohol Vaporizer

Hidden booze flask 🍷

Drag.

- Pipes
- Vapes
- Dab Containers
- Smoke Disguisers
- Tools
- Smell Proof Containers
- Grinders

The Big 4

THAT'S A LOT of information to remember. However, these 4 facts will help you educate others on the harmful effects of vaping.

Nicotine Consumption

Mod, pod or disposable, each vaping device delivers large amounts of nicotine each and every time you hit the vape. At base line, Juul delivers 1 pod to 1 pack of cigarettes while being one of the tamer devices. These would be considered “heavy smokers” 20 years ago. Today our newer pods are the equivalent of multiple packs.

What's in Your Vape?

A better alternative to cigarettes? NO. We have learned that these devices have as much and often more chemicals in them than a traditional cigarette. We know the long term effects already in a cigarette – What happens when you add electricity and metal? Only time will tell.

It's Aerosol! Not Water Vapor!

As we have learned it is not only-NOT WATER VAPOR . Its thousands of chemicals put into an aerosol that is not only harmful to you but also produces the traditional second hand exposure and third hand as well.

Second-hand Aerosol-Third-hand Aerosol

Much like smoking walking through a puff of aerosol is harmful to not only your body but those around you. Even worse is the trail of mess vapes leave behind in the form of third-hand aerosol.

Potency

“We have gone from good farmers, to good chemists” - Ben Cort

“Our Father’s Marijuana”

4% THC

Current: 40%

Oils & Concentrate

50-90%

Wax

70-99%

Shatter

70-99%

Crystallized

90- 99% THC

Addiction to THC is very real and not easy to treat.
Often requires long stays in treatment and requires anti-psychotics.
Many addicted patients require physical detox and medical intervention.

Everything Else.

- **Mushrooms**
- **Hallucinogens**
- **Cocaine**
- **Palcohol**
 - **Eye Dropper alcohol**
 - **Tampons**
- **Single Use Vapes**
 - **Puff Bars**

Places to hide your
stuff pt. 2

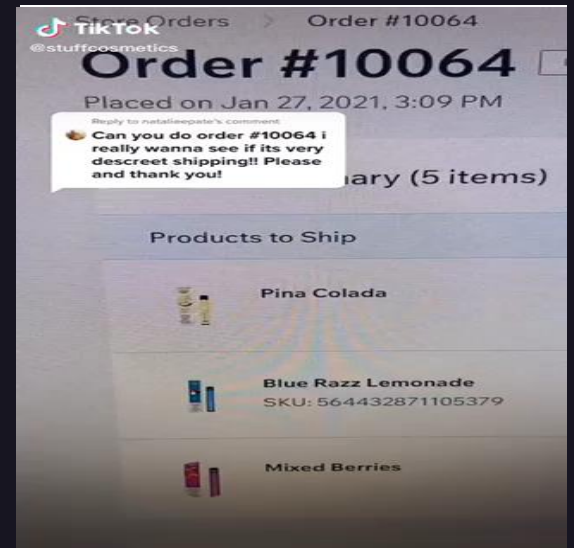

Third Party.

Underage Sellers/Buyers

TikTok is the gift that keeps on giving. Unable to purchase at a mainstream store? Don't have a local dealer? Have no fear.... Just buy it on TikTok. From vapes to pills, edibles to alcohol. Social media has it all especially if you download the following apps: TikTok (marketing), Snapchat (communicating), Cash App (transacting). They will even ship in secret packaging.

How to Talk to Your Kids

It may be hard to believe at times, but as parents and teachers you are a huge influence on the young people in your life. While these talks can seem hard to start you can use teachable moments, and pull from situations they or you have encountered and things seen in popular media. Utilize family time (car time is always great) to hear about their experiences, answer questions, and listen.

Do Your Research

Learn about the dangers, the trends, and arm yourself with research that talks about what is important, upcoming, health risks, and why they should be concerned.

Set Clear Expectations

Share why you don't want them using substances and set clear consequences for if they are caught. Be sure to follow through with the consequences and make sure they are not overly harsh or punitive.

Listen, Respond, Support

Listen to their thoughts, experiences, and questions and do your best to answer any questions they may have. Respond with your expectations, and remind them that you are here to support them. Also remind them that it's okay to use you as a way out of substance use. "I can't my parents would be mad". It is also ok to just hold onto information instead of responding with anger

Set a Good Example

Set a positive example by being substance free. If you do choose to use substances such as alcohol, keep your equipment and supplies secured.
